Ezra Shively-Stjarna

Global Program Manager II Technical Programs @Amazon
(Automation, Process Engineering, Ops Tech) , Board Member,
Mentor

Seattle, Washington, United States

Summary

Impact Summary:

- 600,000+ labor hours removed/avoided (2021-2026) via global mechanisms + automation-first delivery
- 111,800 annualized labor hours removed (most recent year) (≈ 62 FTE capacity); 50% YoY output increase with 16 $\rightarrow$ 5 FTE redesign ($\sim 3.5\times$ productivity)
- Automation roadmap (Phase 1): 386K annual cases automated; 64 HC capacity created; 265K touches removed; ~ 5 M contacts informed without human handling
- Reimbursements: \$4.6M prevented (YTD 2023); $\sim \$4$ M/year prevented going forward (2025 policy alignment; annualized)

Core Skills:

Technical program management (function) • Process engineering • Systems mapping & root cause discovery • Requirements & phased roadmaps • Mechanism design (SOPs, SLAs, governance) • Metrics integrity & capacity planning • Change management & enablement • Global stakeholder influence

Tools:

Asana • QuickSight • AWS ecosystem Architect • Pathfinder / Photon / P4S • Kiro (Bedrock-enabled AI search) • Office 365 • Adobe Cloud

My work:

Global Program Manager building systems that bridge technology and people. Turning frontline reality into scalable, tech-enabled mechanisms that improve business performance. Strong end-to-end owner in ambiguity (problem framing $\rightarrow$ technical discovery $\rightarrow$ cross-org alignment $\rightarrow$ operating model $\rightarrow$ adoption), with measurable outcomes across global operations.

Experience

Amazon

Program Manager II | Global Technical Programs (Automation, AI, Process Engineering, Ops Tech)

March 2020 - Present (5 years 11 months)

Seattle, Washington, United States

- Delivered 111,800 annualized labor hours removed 2025 ($\approx$ 62 FTE capacity) & multi-million-dollar recurring cost avoidance through disciplined evaluation mechanisms, prioritization, and operating cadence. Increased new work output 50% YoY (58,842 $\rightarrow$ 88,000 hours) while reducing team size from 16 to 5 FTE, achieving $\sim$ 3.5 $\times$ productivity per person via workflow redesign and automation.

- Bar-raised quality by evaluating 767 proposals and approving 53 implementations (7% conversion) to protect ROI, compliance, and operational integrity. Scaled Associate Idea Share from pilot into a governed global engine, establishing operating models, SOPs, intake standards, dashboards (Asana + QuickSight), onboarding mechanism, and executive stakeholder rhythms.

- Acted as a tech-ops bridge, diagnosing routing inefficiencies driving 68K monthly cases by mapping end-to-end architecture across Pathfinder, Photon, and P4S. Partnered with senior engineering leaders to define integration points, APIs, and edge-case handling; designed a 3-phase routing solution, aligned multiple orgs, scoped $\sim$ 6 SDE-weeks, and drove approvals. Phase 1 forecast (Dec 2025): eliminate 386K annual cases, create 64 HC capacity, remove 265K annual touches, and surface shipment status for $\sim$ 5M annual contacts without human intervention.

- Restored metrics integrity and capacity planning by quantifying model error (71% overhead vs prediction across 934 cases), resolving 10–45% variance from concurrency attribution, and securing approval for AHT + single concurrency rollout. Result: 10–25% forecasting accuracy improvement and downstream TP90 +5% / TP99 +7% gains.

- Drove Invent & Simplify through AI-assisted duplicate-submission reduction, cutting duplicates 23.7% $\rightarrow$ 11.0%, improving unique submission efficiency +16.6%, and reducing repeat duplicate submitters 75%. Prevented \$4.6M in unnecessary reimbursements (YTD 2023) and aligned policies to avoid $\sim$ \$4M annually,

Carter Motors

Internet Sales Manager (Sales Strategy & Digital Operations)

February 2016 - March 2020 (4 years 2 months)

Greater Seattle Area

- Led digital sales operations and messaging strategy; used engagement/performance analysis to refine content and improve lead quality.,
- Partnered cross-functionally across sales/marketing/content to deliver consistent narratives and measurable funnel improvements.

TFG Label Consulting

Founder / Creative Director

May 2013 - June 2016 (3 years 2 months)

Greater Seattle Area

- Led brand strategy and compliant content delivery; managed cross-functional production workflows end-to-end.

Inspired by Food llc

Program Manager - Innovation and Training

March 2010 - June 2013 (3 years 4 months)

Greater Seattle Area

- Managed/negotiated with 75+ stakeholders; ensured quality and cost performance.
- Increased revenue +\$1.4M (2010–2013) via product/offering optimization and operational improvements.,
- Managed 20+ employees; built SOPs, curriculum, and training materials.

NU Research + Design

Design Researcher

June 2007 - June 2011 (4 years 1 month)

Columbus, Ohio Area

- Conducted user-centered research (ethnography, synthesis, insights) to inform product/brand decisions; presented findings to executive audiences.

Lextant

Design Researcher

June 2006 - March 2007 (10 months)

Creating user-centered design research studies of transportation and technology. Managing, planning, and creating content to support research studies. Screening participants, conducting interviews and moderating focus

groups. Engaging in analysis, and synthesis of research data. Creating topline reports of findings and presenting to key national stakeholders.

Sonic Rim

Design Researcher Co-op

July 2005 - May 2006 (11 months)

Planning, executing and managing multi-country research studies. Creating research tools and interview content to support the research team. Data analysis and synthesis. Creating topline reports and presenting findings to clients such as Microsoft, Motorola, and Samsung R&D.

Education

Columbus College of Art and Design

BFA, Industrial Design: user-centered design research · (2002 - 2006)

The Ohio State University

Associate of Arts - AA, Industrial and Product Design · (1998 - 1999)
